OUR PURPOSE

Mission

To deliver safe, practical and dependable solutions that help clients power facilities, complete projects and sustain operations.

Vision

To become a trusted Nigerian integrated-solutions company recognised for responsible delivery, quality workmanship and long-term client value.

WHAT WE DO

Integrated capability. One responsible team.

01 Electrical Engineering

Wiring, installations, protection, testing, repairs and maintenance for residential, commercial and institutional facilities.

02 Solar & Renewable Energy

Load assessment, system sizing, equipment supply, installation, commissioning and maintenance support.

03 Construction & Renovation

Construction support, refurbishment, finishing, coordination and project-management services.

04 Procurement & Supply

Sourcing and delivery of approved goods, equipment, electrical materials and essential project inputs.

05 ICT & Digital Services

Computer equipment, networks, web and data solutions, digital support and related services.

06 Facilities & Logistics

Facility maintenance, project logistics, consultancy and training tailored to operational needs.

WHO WE SERVE

Ready for different projects and environments.

Government agencies

Procurement, installation, renovation, maintenance and general contract execution.

NGOs & development partners

Field-ready power, ICT, logistics and facility support for programme delivery.

Businesses & institutions

Infrastructure and operational solutions for offices, schools and facilities.

Homes & individuals

Safe electrical work, solar systems, renovations and responsive technical support.

HOW WE WORK

1

Define the need

We clarify the service, site, expected outcome and available project information.

2

Assess & propose

We assess requirements and provide a practical scope, quotation or proposal.

3

Mobilise & deliver

We schedule, execute, test and hand over the agreed work with support.

WHY AMDASCO

Clarity. Quality. Dependable execution.

Site-led planning

Recommendations reflect the actual location, demand, operating environment and budget.

One point of accountability

A coordinated team manages sourcing, technical work, delivery and support.

Safe workmanship

Protection, installation, testing and handover are treated as a complete responsibility.

Practical communication

Clients receive clear requirements, scope, next steps and project updates.

Start your project with AMDASCO.
